

**2015 Report of the Product Endorsement and Funding
Request Committee of the NSEA Board of Directors**

Dennis Batterman, Imperial, Chairperson

The Product Endorsement and Funding Request Committee of the NSEA Board of Directors is responsible for reviewing and recommending products and services that satisfy NSEA standards.

The committee is presented with and researches products, services, or funding requests and takes recommendations to the NSEA Board of Directors for approval. No products are considered that are in conflict with current products offered by the NEA Members Benefits program.

As of the March NSEA Board of Directors meeting, there had been no requests for funding for the committee to consider in the past two years.

The NSEA Board of Directors, after discussion and a vote of that same Board, dissolved this committee due to the fact that no requests have come before this committee.
